OPTIONALS

You use optionals in situations where a value may be absent

? and !

Optional values can be set to nil

```
var possibleString: String? // default  
                             value is nil  
var definiteString: String = ""
```

NIL VS NIL

Mean different things in Swift and Objective-C

DECISION TIME

Check for nil

Force unwrap !

Optional Binding if let...
